

Built once. *Looked after* from there.

A fixed price to design and build it. A small monthly fee to host it, keep it current and keep me on the end of the phone.

01

The monthly is open to discussion. It is a starting point, not a wall — if it does not suit the business, say so on the call and we will land on a number that does.

EVERY MONTHLY PLAN COVERS

- Hosting, managed and fast
- SSL certificate
- Uptime monitoring
- No plugins, so nothing to patch
- Your domain, registered and renewed
- Offsite backups
- Small content edits, an hour a month
- My direct line, reply in two working days

HOW IT RUNS

01

A call

Twenty minutes about the business. No charge, no obligation.

02

A fixed quote

A written scope and one price, agreed before anything starts.

03

Built and live

Three to four weeks from the go-ahead, then it is yours.

The website is yours outright from the day it launches. The monthly is a service, not a lease — no contract, cancel any time, and the site is still yours to take anywhere.
